

RONIT RAJPUT

Software Engineer | AI Engineer | Python Developer

+91 9924644365 | ronitrajput182005@gmail.com | Ahmedabad, Gujarat

LinkedIn | GitHub | Portfolio

Professional Summary

Software Engineer with 6 months of production experience building AI-powered applications, backend services, and automation workflows using Python, FastAPI, SQL, Vertex AI, and Google Cloud Platform. Experienced in developing REST APIs, AI workflows, information extraction pipelines, and cloud-native applications. Strong foundation in software engineering, machine learning, and scalable backend development.

Technical Skills

Languages: Python, SQL

AI Development: LangGraph, LangChain, Vertex AI, AI Agents, Generative AI, RAG

Backend: FastAPI, Flask, REST APIs

Machine Learning: Scikit-learn, Feature Engineering, Model Evaluation

Databases: PostgreSQL, MySQL, BigQuery

Cloud: Google Cloud Platform, Cloud Run

Tools: Git, GitHub Actions, Docker

Libraries: Pandas, NumPy

Experience

Technical Trainee

Jan 2026 – Jun 2026

Tatvic Digital Analytics Pvt. Ltd.

Ahmedabad, India

- Built AI-enabled analytics pipelines using Python, SQL, and BigQuery ML for production forecasting and business KPIs.
- Developed a Vertex AI Gemini validation layer for LLM output evaluation, reducing production false-positive alerts by 75%.
- Built LangGraph-based AI workflows integrating LLMs and structured data processing, reducing analytics reporting time from 6 hours to under 1 hour.
- Developed and deployed FastAPI services on Google Cloud Run using Docker and GitHub Actions.

Projects

Finance Intelligence MCP Server | *Python, FastMCP, PostgreSQL, SQLAlchemy*

Jul 2026

- Designed and published a production-ready Finance Intelligence MCP Server using FastMCP and PostgreSQL.
- Built modular backend services and AI-powered tools for expense management, financial analysis, and reporting using FastMCP, PostgreSQL, and SQLAlchemy.

Job Intelligence Platform (In Progress) | *Python, FastAPI, Playwright, PostgreSQL, LLMs, n8n*

Jul 2026 – Present

- Built an AI-powered information extraction platform using Playwright, FastAPI, and LLMs to convert unstructured career pages into structured job data.
- Developed an modular data pipeline with HTML processing, token chunking, validation, and structured information extraction.
- Implemented job scoring, notification workflows, and backend APIs using FastAPI, PostgreSQL, and n8n.

Real Estate ML Decision Support System | *Python, Scikit-learn, Streamlit*

Jun 2025 – Jul 2025

- Built a machine learning application using over 30,000 real estate listings for price prediction and decision support.
- Performed data preprocessing, feature engineering, model training, and evaluation using Random Forest and SVM.

Education

Adani University

Ahmedabad, India

Bachelor of Technology in Information and Communication Technology (ICT) — CGPA: 8.72/10

2022 – 2026

Certifications

- Google Analytics 4 Certification
- Diploma in Multilingual Computer Programming (CDAC)
- Data Science Mentorship Program
